Analysis Under Pure Food Law.

A catarrh cure that retails for \$1.00 an ounce in Vermont drug stores has been found to contain absolutely nothing but common cooking soda.

Another medicine labelled to contain the extract from Mexican beans was found to be borax.

These are some of the results of the analysis now being made at the Vermont state laboratory of hygiene of medicines sold in Vermont and many of them manufactured there.

The two mentioned are manufactured outside of the state, but some irrelugarities were found in many of the preparations put up in the state.

For instance, a medicine labelled to contain but 9 per cent. Another which was labelled to contain 20 per cent. was found to have but 3 epr cent. alcohol.

These analysis are made under the direction of the state hoard of health.
